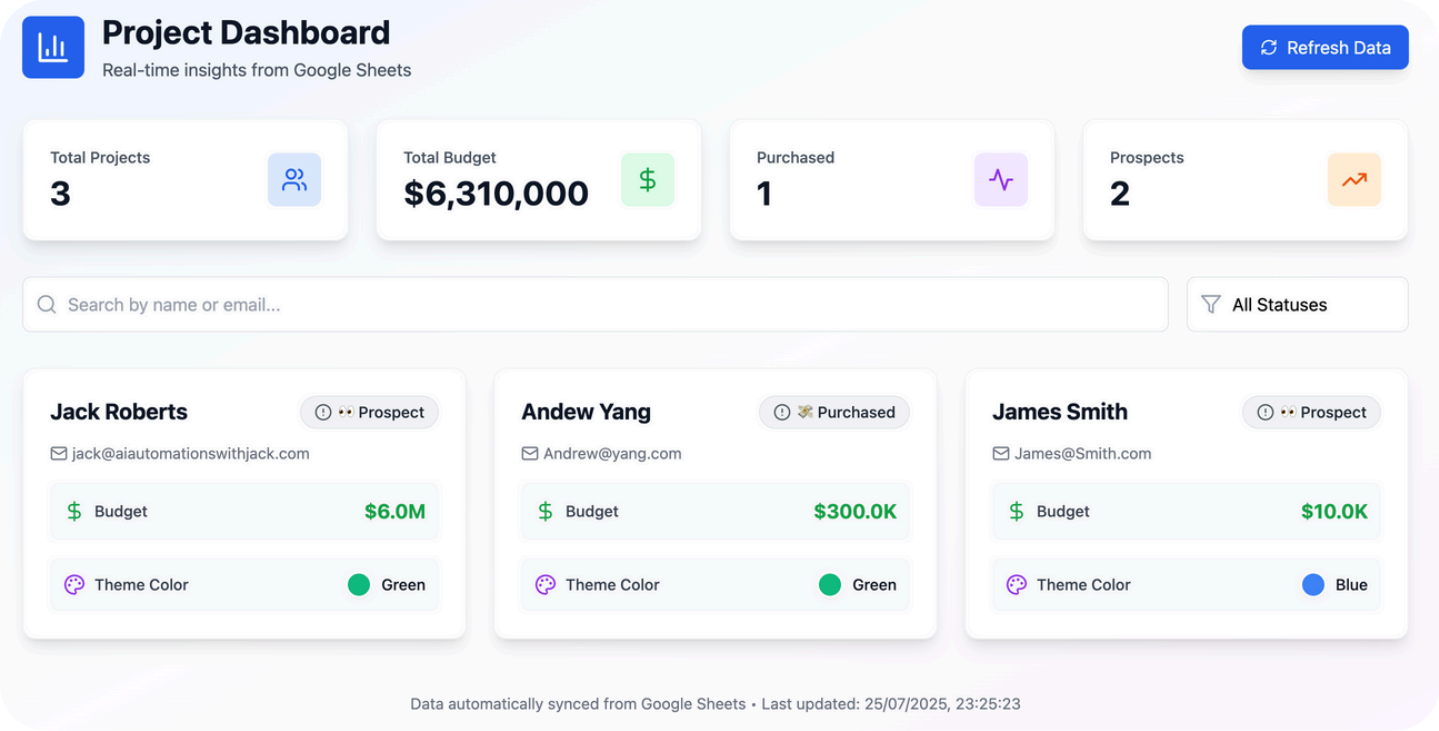
# 5 high ROI use cases.



## 📊 1) Social Media Intelligence Dashboard

Track performance metrics from LinkedIn, Instagram, X, and YouTube in real time.

**Steps to implement:**

a. Use N8N to fetch metrics from social APIs.
b. Feed those into Google Sheets.
c. Bolt displays these metrics visually.
d. Pull competitor videos and trending content for comparison.
e. Use insights to shape and schedule your own content.

💡 Tip: Highlight your highest performing posts to replicate patterns; Look at your competitors - you're looking for customer residents. What gets the engagement? What are people clicking on?

## 🤖 2) AI CRM

Track every interaction with a lead across emails, meetings, forms, and budgets.

**Steps to implement:**

a. Sync your CRM data into a central Google Sheet.
b. Bolt reads and displays the data in a visual pipeline.
c. Use N8N to update status dynamically (e.g., moving from lead → client).
d. Add a chat interface to ask "What's the last thing John Doe did?"

💡 Tip: Build this as part of your systems. Understand what the key metrics are that move it for your business or your client's business and connect those together in your AI dashboard to enable better decision making.

## 💼 3) Recruitment Workflow Automation

Manage candidates from application to interview - without manual tracking. This is an example of the kind of dashboard automation you can build for your own business or others.

**Steps to implement:**

a. Form submissions are logged into Sheets.
b. Display candidate stages using Bolt (applied, reviewing, approved).
c. When moved to "approved," N8N triggers email/text invites.
d. AI can analyse candidate data and sort by score or availability.

## 4) Custom AI Agent (e.g., JackGPT)

Give your clients, students, or customers 24/7 access to your expertise. Yes, check him out here.

**Steps to implement:**

a. Train an AI on your videos, articles, and content.
b. Deploy the agent in Bolt as a chatbot.
c. Connect to N8N to retrieve data or push updates (e.g., classroom modules).
d. Prompt it to answer in your tone of voice.

💡 Tip: Add memory so it recalls previous user questions and follows up.

## 💪 5) Personal Productivity OS

Track meals, meetings, habits, and energy all in one place.

**Steps to implement:**

a. Set up a habit tracker in Sheets (meals, water, gym, sleep).

b. Bolt displays your daily scores and metrics visually.
c. Use a chat interface to log meals or say “book a workout for tomorrow.”
d. Automations send nudges or schedule things via Google Calendar.

💡 Tip: Use AI to find patterns—like missed workouts after late nights.
